SUMMARY

Motivated and skilled Associate Software Engineer with 9 months of professional experience in a startup environment. Self-taught Angular developer, successfully working on both frontend and backend development, debugging, testing, optimization, and documentation. Demonstrated ability to independently acquire new skills and apply them effectively. Successfully transitioned from an intern to a full-time Associate Software Engineer within the same startup, showcasing dedication and exceptional performance. Collaborative team player with a passion for delivering high-quality software solutions.

KEY SKILLS

- **Full-Stack Development:** Proficient in frontend and backend development using Angular, with hands-on experience in designing and implementing user-friendly interfaces and scalable backend solutions.
- **Problem-Solving:** Skilled at troubleshooting and debugging complex issues, ensuring smooth software functionality and optimal performance.
- **Independent Learning:** Demonstrated ability to independently learn and use Angular, showcasing a self-driven and proactive approach to professional development.
- **Testing and Optimization:** Experienced in conducting thorough testing and implementing performance optimizations to deliver robust and efficient software solutions.
- **Documentation:** Proficient in creating clear and comprehensive technical documentation to facilitate understanding and maintainability of software projects.
- **Startup Experience:** Adapted well to a fast-paced startup environment, displaying flexibility, resourcefulness, and the ability to multitask effectively.

TECHNICAL SKILLS

- | | | |
|--------------|-------------------|-----------------------|
| • AngularJS | • PHP | • Android Development |
| • TypeScript | • C++ | • MySQL / Sequelize |
| • Java | • Ionic Framework | • REST APIs |
| • JavaScript | • Firebase | • Agile |

PROFESSIONAL EXPERIENCE

STAT Health Technology Inc.

Associate Software Engineer

Taguig, Manila

October 2022 – June 2023

- Successfully transitioned from an intern to a full-time Associate Software Engineer within the same startup, leveraging internship experience and showcasing exceptional performance.
- Independently learned Angular and actively contributed to the development of both frontend and backend components of software applications.
- Collaborated with cross-functional teams to design, develop, and maintain scalable and responsive user interfaces, ensuring an exceptional user experience.
- Implemented performance optimizations to enhance software functionality, improve overall system efficiency, and utilized Sonarqube for code quality analysis.
- Created detailed technical documentation and code documentation to facilitate seamless maintenance and future development.
- Actively participated in agile development processes.
- Adapted quickly to changing requirements and priorities, demonstrating flexibility and an ability to handle multiple tasks simultaneously.

EDUCATION

Cavite State University - Don Severino Delas Alas Campus

Bachelor of Science in Information Technology

April 2023

- Capstone Project: Android-based Mobile E-Clearance System
